Project Name	Industry-specific intelligent fire management system
Maximum Marks	2 Marks

I am	A customer	I need a pleasant and modern fireplace control machine
I am trying to	Ensure the fire safety in my industry	I can keep away from the fireplace explosion in my industry and preserve all my merchandise safe from the fireplace spread
But	I want to handle it easily	By doing fire protection inside the shape of automation the usage of the recent easy technology
Because	The fire explosion should be automatically detected without any human monitoring	The fire explosion on the ignition level may be detected and controlled
Which makes me feel	That my Industry and my workers are safe	It saves the enterprise and lives of the people
